

GK-M4-Lesson 12

Fill in the number bond to match the squares.

I see 6 as 5 on the top and 1 on the bottom.

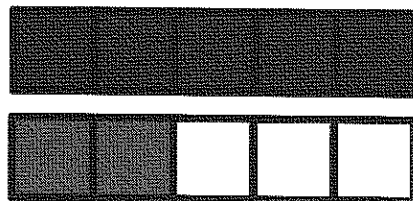

6 is 5 and 1 more.

Color 5 squares blue in the first row.

Color 2 squares red in the second row.

A faster way to count 5-groups is like this: fiiiiive, 6, 7. If I need to, I can count all the squares I colored.

7 is 5 and 2 more.
