

### GK-M4-Lesson 13

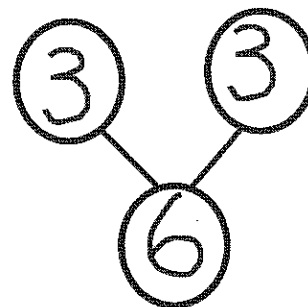

There are 3 monkeys and 3 elephants. All 6 animals are going into the circus tent. Fill in the number sentence and the number bond.

This story starts with the parts and ends with the whole. I'll write my number sentences that way, too!

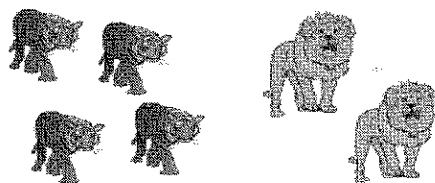

$3$  and  $3$  is  $6$

$3 + 3 = 6$

There are 6 animals. 4 are tigers, and 2 are lions. Fill in the number sentences and the number bond.

$6$  is  $4$  and  $2$

$6 = 4 + 2$

This story is different. It starts with the whole and ends with the parts. I'll write my number sentences that way, too!
