

GK-M5-Lesson 14

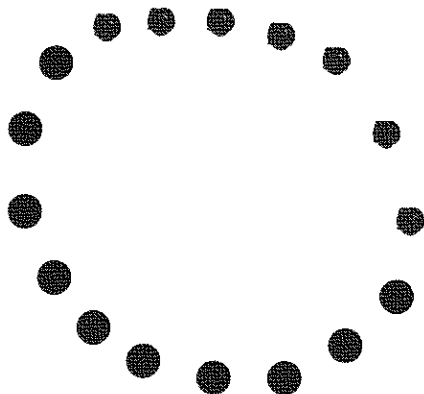

Count the objects. Write the number in the box next to the picture.

12

When I count in a circle, it is tricky. I need to remember where I start. I can color the first one I count to help me remember where I started.

Count and draw in more shapes to match the number.

17

There are 10 black dots. I know the number in the box is 17. Seventeen is ten 7 the Say Ten way. I can draw 7 more circles.
