

GK-M5-Lesson 17

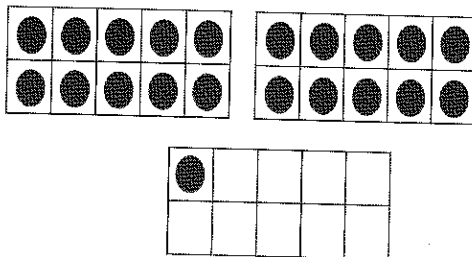

Draw more to show the number.

42 is the same as 4 tens 2. The first ten-frame is full, so I don't need to draw more dots. I make dots in each ten-frame until 4 ten-frames are full. Then, I add two more dots to make 42.

42

21

I draw more dots to get to 20 and then add 1 more to make 21 dots!
