

## GK-M5-Lesson 18

Use your Rekenrek, hiding paper (a blank sheet of paper), and crayons to complete each step listed below. Read and complete the problems with the help of an adult.

Hide to show just 40 on your Rekenrek dot paper. Touch and count the circles until you say 24. Color 24 (the 24<sup>th</sup> circle) green.

- Touch and count each circle from 24 to 32.
- Color 32 (the 32<sup>nd</sup> circle) with a red crayon.

Rekenrek

I start at the first circle and count each one until I count to 24. Do you see a faster way?

I count from 24 until I get to 32 and color the circle red.

I count by 10's on my Rekenrek paper until I get to 40. I cover the rest of the Rekenrek with my hiding paper.
