

G1-M4-Lesson 15

1. Solve the problems.

$9 + 5 = \underline{14}$

9 plus 5 is 14.
That one's easy.

$19 + 5 = \underline{24}$

19 plus 5 is just 10 more.
That's 24.

$29 + 5 = \underline{34}$

29 plus 5 is 10 more again.
That's 34.

2. Use the first number sentence in each set to help you solve the other problems.

a. $3 + 8 = \underline{11}$

b. $13 + 8 = \underline{21}$

c. $23 + 8 = \underline{31}$

3. Solve the problems. Show the 1-digit addition sentence that helped you solve.

$18 + 4 = \underline{22}$

$\underline{8 + 4 = 12}$

I can use $8 + 4$ to help me solve $18 + 4$. I know that $8 + 4 = 12$. $18 + 4$ has 1 more ten. That's 22.
