

G1-M5-Lesson 5

Use your tangram pieces to complete the problems below.

Draw or trace to show the parts you used to make the shape.

1. Use 2 triangles to make a square.

I can make a square with two triangles just like I did in class! I know that if I fold a square in half diagonally, it will make two triangles, so I just put my triangles together with the long sides touching, and it makes a square!

2. Use the square you made and a triangle to make a house.

I can add to my square to make a house. I just take the small triangle from my tangram pieces and put it on top to make a roof!
