G1-M5-Lesson 6

Use some 3-dimensional shapes to make a structure. Ask someone at home to take a picture of your structure.

I used 4 cylinders to make the bottom of each tower. I used soup cans for the cylinders. I put each cylinder on a

I made a castle! I started by putting a big cube on the floor. The cube is a cardboard box!

I used 4 cones to make each tower pointy on the top! I used ice cream cones for the cones. I put each cone on top of each cylinder. Now I have a castle!

Lesson 6:

Create a composite shape from three-dimensional shapes and describe the composite shape using shape names and positions.
