

G1-M5-Lesson 7

1. Are the shapes divided into equal parts? Write Y for yes or N for no. If the shape has equal parts, write how many equal parts there are on the line.

<p>a.</p>  <p><u>Y</u> <u>2</u></p>	<p>b.</p>  <p><u>N</u> _____</p>	<p>c.</p>  <p><u>Y</u> <u>4</u></p>
<p>d.</p>  <p><u>Y</u> <u>2</u></p>	<p>e.</p>  <p><u>N</u> _____</p>	<p>f.</p>  <p><u>Y</u> <u>4</u></p>

I know there are equal parts when every part is exactly the same. If every part is exactly the same, I just count how many!

2. Draw 1 line to make 2 equal parts. What smaller shapes did you make?

I can make 2 equal parts in different ways. I can make 2 rectangles or 2 triangles.

I made 2 rectangles.

3. Draw 2 lines to make 4 equal parts. What smaller shapes did you make?

I made 4 squares.

I can make 4 equal parts by drawing 2 lines. Then I have 4 smaller squares that are all equal!

4. Draw lines to make 6 equal parts. What smaller shapes did you make?

I made 6 rectangles.
