

G1-M1-Lesson 16

1. Use simple math drawings. Draw more to show $6 + ? = 9$.

I can start at 6 and count on as I draw. I'll stop when I get to 9. Siiiiix...

= 9

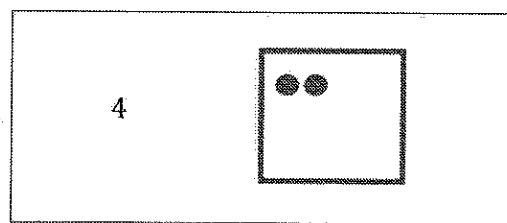

...7, 8, 9.

6 + 3 = 9

I drew 3 more circles, so $6 + 3 = 9$.

2. Use your 5-group cards to solve $4 + ? = 6$.

I can start at 4 and draw the dots that are on the back of a 5-group card. Fooooor...

= 6

...5, 6.

4 + 2 = 6

I drew 2 dots, so $4 + 2 = 6$.
