

G1-M1-Lesson 39

Solve the unshaded addition problems below. Write the two subtraction facts that would have the same number bond. To help you practice your addition and subtraction facts even more, make your own number bond flash cards.

5 + 0	5 + 1	5 + 2	5 + 3	5 + 4	5 + 5
6 + 0	6 + 1	6 + 2	6 + 3	6 + 4	
7 + 0	7 + 1	7 + 2	7 + 3		
8 + 0	8 + 1	8 + 2			
9 + 0	9 + 1				
10 + 0					

5 + 4 uses a 5-group, since 5 is one of the addends. I'll make the subtraction flashcards $9 - 5 = 4$ and $9 - 4 = 5$.

7 + 2 is 9. I can make two subtraction sentences, starting with the total of 9.
 $9 - 7 = 2$ and $9 - 2 = 7$.

$9 - 7 = 2$	$9 - 2 = 7$
$10 - 7 = 3$	$10 - 3 = 7$
