

G1-M2-Lesson 14

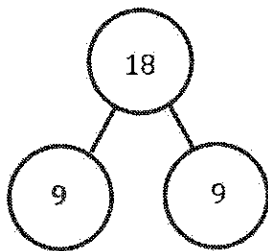

1. Draw and circle 10. Subtract and make a number bond.

$$17 - 9 = \underline{8}$$

I can break apart 17 into 10 and 7. I can take 9 from the ten! It's called the take from ten strategy! Then, 1 and 7 make 8.

2. Complete the number bond, and write the number sentence that helped you.

$$\underline{1 + 8 = 9}$$
