G5-M1-Lesson 7

Round to the given place value. Label the number lines to show your work. Circle the rounded number. Use a place value chart to show your decompositions for each.

ones	tenths	hundredths
3	2	7
	32	7
		327

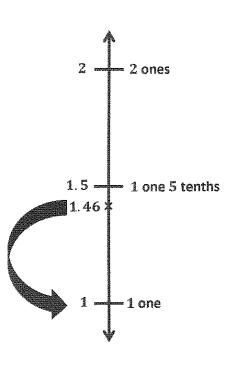

I can think of 3.27 in several ways. I can say it is 3 ones ± 2 tenths ± 7 hundredths. I can also think of it as 32 tenths ± 7 hundredths or 327 hundredths.

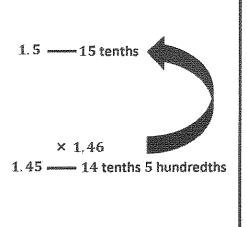

2. Rosie's pedometer said she walked 1.46 miles. She rounded her distance to 1 mile, and her brother, Isaac, rounded her distance to 1.5 miles. They are both right. Why?

Rosie rounded the distance to the nearest mile, and Isaac rounded the distance to the nearest tenth of a mile.

1.46 rounded to the nearest one is 1.

1.46 rounded to the nearest tenth is 15 tenths or 1.5.

1.4 ---- 14 tenths
