

GK-M1-Lesson 29

Count the dots. Write how many. Draw the same number of dots below but going up and down instead of across.

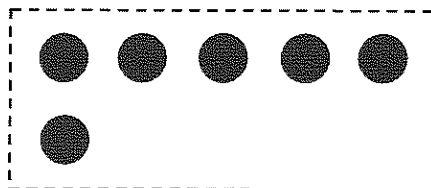

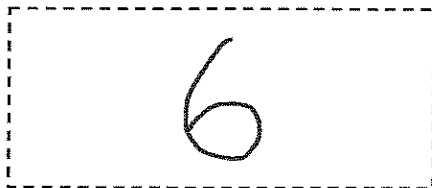

I can show a number by writing the numeral or by drawing dots.

I can draw 8 circles. I have 8. One more is 9.

Make your own 5-group cards! Cut the cards out on the dotted lines. On one side, write the numbers from 1 to 10. On the other side, show the 5-group dot picture that goes with the number.

This is just like the Math Way of counting on my fingers! I have a row of 5 dots and then 1 more. I show 6 as 5 fingers on one hand and 1 on the other. I can count: five, six.
