

GK-M1-Lesson 35

Count all the squares in each tower, and write how many. Share with someone what you notice!

I can count the squares in this tower. There are 4. 1 less is 3. The towers keep getting smaller and so do the numbers!

I can count the squares in the last tower, too. There is 1 square left. 1 less is 0.

4 3 2 1
