

GK-M2-Lesson 10

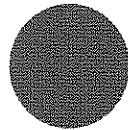

Search your house to see what shapes and solids you can find. Draw the shapes that you see by tracing the faces of the solids that you find. Color your collage.

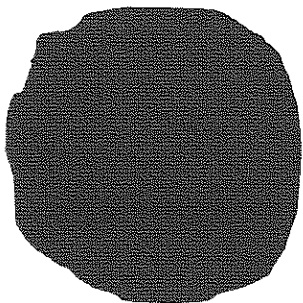

I traced a can of green beans. The shape of the can is a cylinder, and the face is a circle.

This is a block from my room! It is a cube, which has 6 square faces.

I ate an ice cream cone for dessert. Its face is a circle, too!

This is my bouncy ball! It is a sphere. It doesn't have a face. It's curved all over.
