

### GK-M2-Lesson 3

Color all the rectangles red. Color all the triangles green.

I know the white shapes are not rectangles or triangles because they have more than three or four sides.

The red shapes are rectangles because they have 4 sides and 4 corners. A square is a special rectangle where all sides are the same.

In the box, draw 2 rectangles and 2 triangles. How many shapes did you draw? Put your answer in the circle.

I drew 2 rectangles and 2 triangles, which makes 4 shapes altogether.
