

GK-M3-Lesson 19

Draw another bug so there are the same number of bugs as leaves.

I can draw one more bug so there are the same number of bugs as leaves!

In the box below, draw 6 hearts

Draw triangles

so there are *fewer* triangles

than hearts

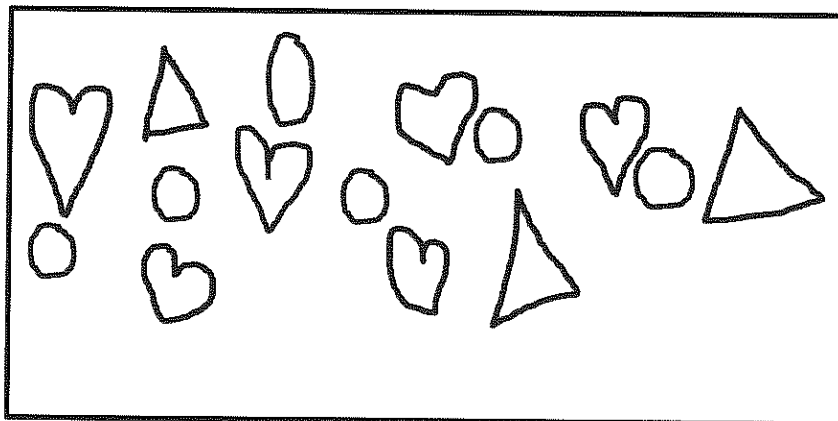

Draw circles

so there are the *same* number of circles

as hearts

I know I have fewer triangles than hearts because I drew 6 hearts, and I only drew 3 triangles!
