

GK-M3-Lesson 29

Draw a line from each container to the word that describes the amount of liquid the container is holding.

Full

Not Full

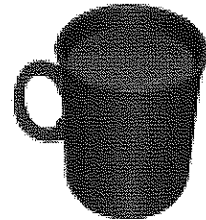

Empty

I see some liquid, but it is not to the top. So, this bottle is not full.

I know that when there is nothing in a container, it is empty.

I know that when the liquid is to the top, it is full. Coffee is hot. If the mug were full to the brim, you might burn your mouth!
