

## GK-M3-Lesson 31

Read the following directions to your child to make a house:

- Draw a square as wide as a fork.
- Draw a triangle on top of the square as tall as your pinky for the roof.
- Draw a rectangle as long as your thumb for the door.
- Draw 2 square windows each as long as a fingernail.

Hmm...let me look at my pinky to see how tall the roof should be.  
Yes, that looks about right!
